## 595

'y' pattern strainer

## Design

Altecnic provides a wide range of ' $Y$ ' pattern strainers suitable for many applications.
Using the most efficient design for debris removal, utilising generously proportioned screens, this extends the period before the screen requires cleaning.
Available in the sizes 15 mm to 28 mm with compression ends, also available in sizes $3 / 8^{\prime \prime}$ to $4^{\prime \prime}$ with BSP threaded ends.
The bodies are constructed from brass with compression ends for use with copper tube.
The strainer screens are manufactured from 304 austenitic stainless steel for good corrosion resistance in potable water and other applications.
The nitrile 'O' ring seal enables the cap to be removed and replaced easily when the screen requires cleaning and makes the strainers suitable for oil service.
Application
The Altecnic range of ' $Y$ ' pattern strainers is designed for use within commercial and domestic applications to protect control valves and other equipment and maintain system efficiency.
The strainers are a WRAS approved product for use with potable water and with compression ends are ideally suited for installation in the supply to shower valves and controllers.
